Next Import the aircraft file into RealFlight...

**5.** Start RealFlight. Click Simulation, highlight Import > click on RealFlight Archive (RFX, G3X)...

**6.** Select the plane(s) you wish to Import into RealFlight > then click Open (to Import into RealFlight).

If an Import fails due to "This aircraft variant could not be loaded. It is based on an aircraft you do not have."

You'll need to Download and Import the default aircraft file ending \_EA.RFX that the RCFS Aircraft Variant is based on.

After Importing the \_EA.RFX Aircraft file into RealFlight, Import the Aircraft Variant ending by RCFS\_AV.RFX

RealFlight 9.5

The optimized 1st RC Flight School Aircraft will be located in the Custom Aircraft folder for you to select and OK to fly.
